

## **BISTRO SYSTEM** An original One-man-show

The patented finum® Bistro System offers you a very individual way to enjoy your tea.

The permanent stainless steel mesh filter is very durable and tasteless.

It offers the tea ample room to expand and to develop its body.

While gently steeping your tea the hat prevents heat-loss and retains the aroma. When the brewing has finished the hat serves as a handy drip-off tray for the brewing basket.

The stylish cup is made of heat safe borosilicate glass.

The finum® Bistro System is safe for dishwasher use.

Enjoy a cup of tea at home, in your office or at a bistro.
