

## ENGLISH TEA POT

### The German Way

Surprisingly though the English are not the worldwide tea champions. Instead, statistics give away the secret that northern Germans come on third whereas the English quench their tea thirst on the eleventh place. And this is not all. As the Germans very much value the quality of loose teas and are less enamoured with tea bags there comes some invention from the North – the finum® English tea pot with the cleverly interlocking filter insert.

The permanent filter insert by finum® – patented in the USA and Germany – has an opening at the top rim which retains the tab of the lid. Neither does this affect the classic design, nor its capability to close precisely. Moreover it is adjusted so perfectly that you can pull the filter out of the pot with the aid of the tab of the lid in one simple move, really simple and ingenious.

For true aromatic enjoyments the infuser has been constructed of taste and odor-free stainless-steel micromesh and a heat-tolerant plastic frame. The high quality materials of both components – filter and pot – guarantee long durability and dishwasher safety.

The ceramic pot comes in two sizes, a two-cup version of 0.5 l and a 5-6 cup version with a capacity of 1.2 l. The English Tea Pot 0.5 l is being produced in four different colours – yellow, blue, green and white.

The finum® English Tea Pot prepares tea the German way.
