Item. No. 66/428.60.x0

**Iced Tea Control 1.8**  
The "cool" Tea Maker

Feature	Details
Set contains	- 1 x plastic jug - 1 x tea control brew-stop filter - 1 x instruction manual
Jug	- 1.8 liter (65 OZ) capacity - robust break-proof plastic (PC) - suitable for hot and cold liquids - designed for outdoor / garden use - also works as a juice carafe - easy to clean under faucet - ø: approx. 14,8 cm - height: approx. 22,5 cm
Filter	- brew-stop tea filter "Tea Control" - colours available: black (00), yellow (80), red (40) - filter material: PA - dishwasher safe - taste unaffected - International patents: EP 1029484 US Pat. 6318244 CN (HK) 0006547.5
Packaging	- 1 set / gift box - 6 boxes / master carton - 288 boxes / pallet - multi-lingual instruction manual (DE, EN, FR, ESP, JAP, CN)
Highlights	The robust pitcher should be filled to just below the filter insert with ice cubes - or even better crushed iced. Pour in hot water to fill the entire pitcher, place the lid into the filter and let the tea brew. Take the pitcher with you anywhere where you want to serve the tea. Remember: you will not have to remove the filter. Just turn the lid clockwise when the tea is strong enough and the brewing process will stop. No dripping, no waiting; just enjoy nearly 2 litres of delicious ready-to-drink iced tea.

## ICED TEA MAKER

### The "cool" Tea Maker

Summers are hot and nobody likes to spend too much time indoors preparing a refreshing drink. The Tea Control patent allows you to brew the freshest iced tea in an instant.

The new Iced Tea Control offers the perfect solution – quicker and simpler you won't be able to brew fresh delicious iced tea. It works with your personal blend of ingredients and loose teas as well as teabags.

The robust pitcher of high quality PC should be filled to just below the filter insert with crushed iced (alternatively with ice cubes). Then you insert the filter and add 3–5 tea spoons of good tea. Pour in hot water to fill the entire pitcher, place the lid into the filter and let the tea brew. Take the pitcher with you anywhere where you want to serve the tea.

Just turn the lid clockwise when the tea is strong enough and the brewing process will stop without having to remove the filter. To drink it ice cold you may want to place additional ice cubes in the glass.

No dripping, no waiting, just enjoy your ready-to-drink iced tea. The lightweight and robust pitcher contains 1.8 liters of delicious iced tea – enough for an open-air summer party.
