

DISPOSABLE TEA FILTERS

The world's most requested disposable Tea Filters

finum® filters are internationally renown. The variety of sizes give each tea enthusiast the chance to enjoy their tea in their individually preferred manner. Each type comes in several consumer friendly sizes, for pots and mugs as well as cups and glasses. Four optional holders (click, clip, top holder and the new stick) round up the offer.

All filters can be used without a holder. Some have an especially long fill-in-flap, which makes it it easier to fill in your tea. The flap is also used to fix the filter at the rim of your tea pot by closing the lid.

Our newest paper filter accessory is the Filter Stick. It allows the filter to stay open, so that the tea lover may watch over the tea leaves as they unfold their aroma and color. A true visual enjoyment.

All our filters have a pleated bottom which expands as the tea leaves unfold for full their bodied flavor. finum® tea filters are made of biodegradable cellulose and manila hemp. Our oxygen bleached paper is famous for its unique true-flavor filtering qualities.
